

AMENDMENTS TO THE CLAIMS

The claims as listed below will replace all prior listings and presentations of claims in the above-identified application.

Please amend Claim 1 as follows:

1. **(Currently amended)** A glaucoma treatment kit, comprising:
 an implant comprising:
 an outflow portion sized and shaped to be received within Schlemm's canal of an eye; and
 an inflow portion in fluid communication with the outflow portion, the inflow portion configured to be disposed in ~~[[the]]~~ an anterior chamber of the eye; and
 an applicator configured (i) to releasably hold the implant and (ii) to be introduced into the anterior chamber for implantation into eye tissue;
 wherein a long axis of a flow path of the inflow portion is disposed generally transversely to a long axis of a flow path of the outflow portion when the implant is releasably held by the applicator.
2. **(Previously presented)** The glaucoma treatment kit of Claim 1, wherein the applicator comprises a tube that releasably holds at least part of the inflow portion of the implant.
3. **(Original)** The glaucoma treatment kit of Claim 1, wherein the implant is substantially L-shaped.
